

Environmental Policy

LOGO International Ltd recognise that our business activities affect the natural environment in a number of ways.

We strive through continuing improvements to minimise the adverse effects on the environment and the earth's natural resources, whilst safeguarding the health and safety of our employees and the public.

We purposely seek out suppliers who take positive action to minimise both waste and the impact on their manufacturing processes on the surrounding environment.

Internally, we constantly look for ways to reduce waste through more efficient procedures and recycling initiatives and are taking part in the CN28 (Carbon Neutral Nottingham 2028)

These include:-

- Recycling pallets and boxes
- Eliminating all plastic strapping from boxes
- Reducing plastic packaging
- All plastic packaging is made from minimum 30% recycled plastic with the majority 100% recycled , by 2025 we expect all packaging to be 100% recycled.
- Reduction in the use of paper. We aim to reduce paper usage by 50% by 2025
- Company cars – all company car when they are due to be replace will be replaced by Electric cars
- Make our office as environmentally friendly as possible
- Logo International will comply with, or exceed, our environmental obligations, including taking a proactive approach regarding environmental legislations that effects our business.

Sustainable and organic brands

Our industry is working hard to make changes to the way products are made and many garment brands now offer sustainable items made with organic or recycled materials. There are multiple ethical standards such as Fairtrade, Sedex and Peta Vegan Approved with which many of the brands we sell are aligned.

Animal and toxin-free inks

Our DTG (Direct to Garment) process uses water-based NeoPigment™ inks which are non-hazardous and non-toxic. As a water-free printing system, it's the most eco-friendly printing solution on the market.
